EXPERIENCE

Full-Stack Developer (Intern)

Tech Startup

Mar 2023 – Nov 2023

Remote

Developed a photogrammetry web app using React/TypeScript and Node.js in Docker. Resolved cross-library compatibility issues and optimised data transfer speed. Automated CI/CD pipelines with GitHub Actions, reducing deployment time. Added WebSocket functionality for real-time data transfer. Collaborated with a distributed Agile team to deliver iterative improvements.

PROJECTS

Interactive Portfolio Website

Personal Project

Present

Building an interactive portfolio with Three.js and React Three Fiber. Designed a reusable context-based global dialogue box system to enhance user experience.

Dating Game

University Project

2023

Created and optimised several Unity games, collaborating with art and design students. Contributed to troubleshooting, integration, and iterative feature development.

Sign Language Translating Gloves

University Project

2022

Developed Arduino-based gloves in C++ that translated sign language gestures into on-screen text.

TECHNICAL SKILLS

JavaScript / TypeScript

C# / C++ Python

SQL / T-SQL / PostgreSQL

React / Vue Node.js

CI/CD Automation

REST APIs & WebSockets

Unity / Three.js Docker

Network Fundamentals

Git / GitHub Microsoft 365

SOFT SKILLS

Technical Documentation

Client Communication

Cross-functional Teamwork

Problem Solving

EDUCATION

Bachelor of Information Technology

Otago Polytechnic

2021 – 2024
